Former Director (P&D), DTE &
CBT&A Trainer

Management and Organization of Online Classes: Challenges and Opportunities

The spread of the infective disease caused by the COVID-19 has caused an international health pandemic that has had challenging ramifications socially and economically and on education as one of the significant areas disrupted. However, this disruption could be the beginning of a surprising innovation because the institutions, including educational ones, responded to the travel bans and home quarantines by shifting to online interaction. Although major issues arise from the crisis that caused the shift, users worldwide wonder whether COVID-19 could act as a catalyst for the online progress in educational procedures and accelerate the use of the latest technology to the point where the future becomes the present. The coronavirus pandemic has revolutionized global education through the unprecedented introduction of new solutions, tools, and applications. According to UNESCO's statistics, the closure of universities worldwide to contain the COVID-19 pandemic has affected 91% of the student population.

Main Challenges & Opportunities of organizational behavior are:

- Improving peoples skills.
- Improving quality and productivity/employability
- Total quality management (TQM)
- Managing workforce diversity
- Responding to collaboration
- Empowering employees and clients

Challenges & Opportunities (Cont..)

- Coping with temporariness
- Stimulating innovation and change
- Emerges of e-organization and e-learning
- Improving ethical behavior
- Improving clients services
- Helping employees balance work-life conflicts

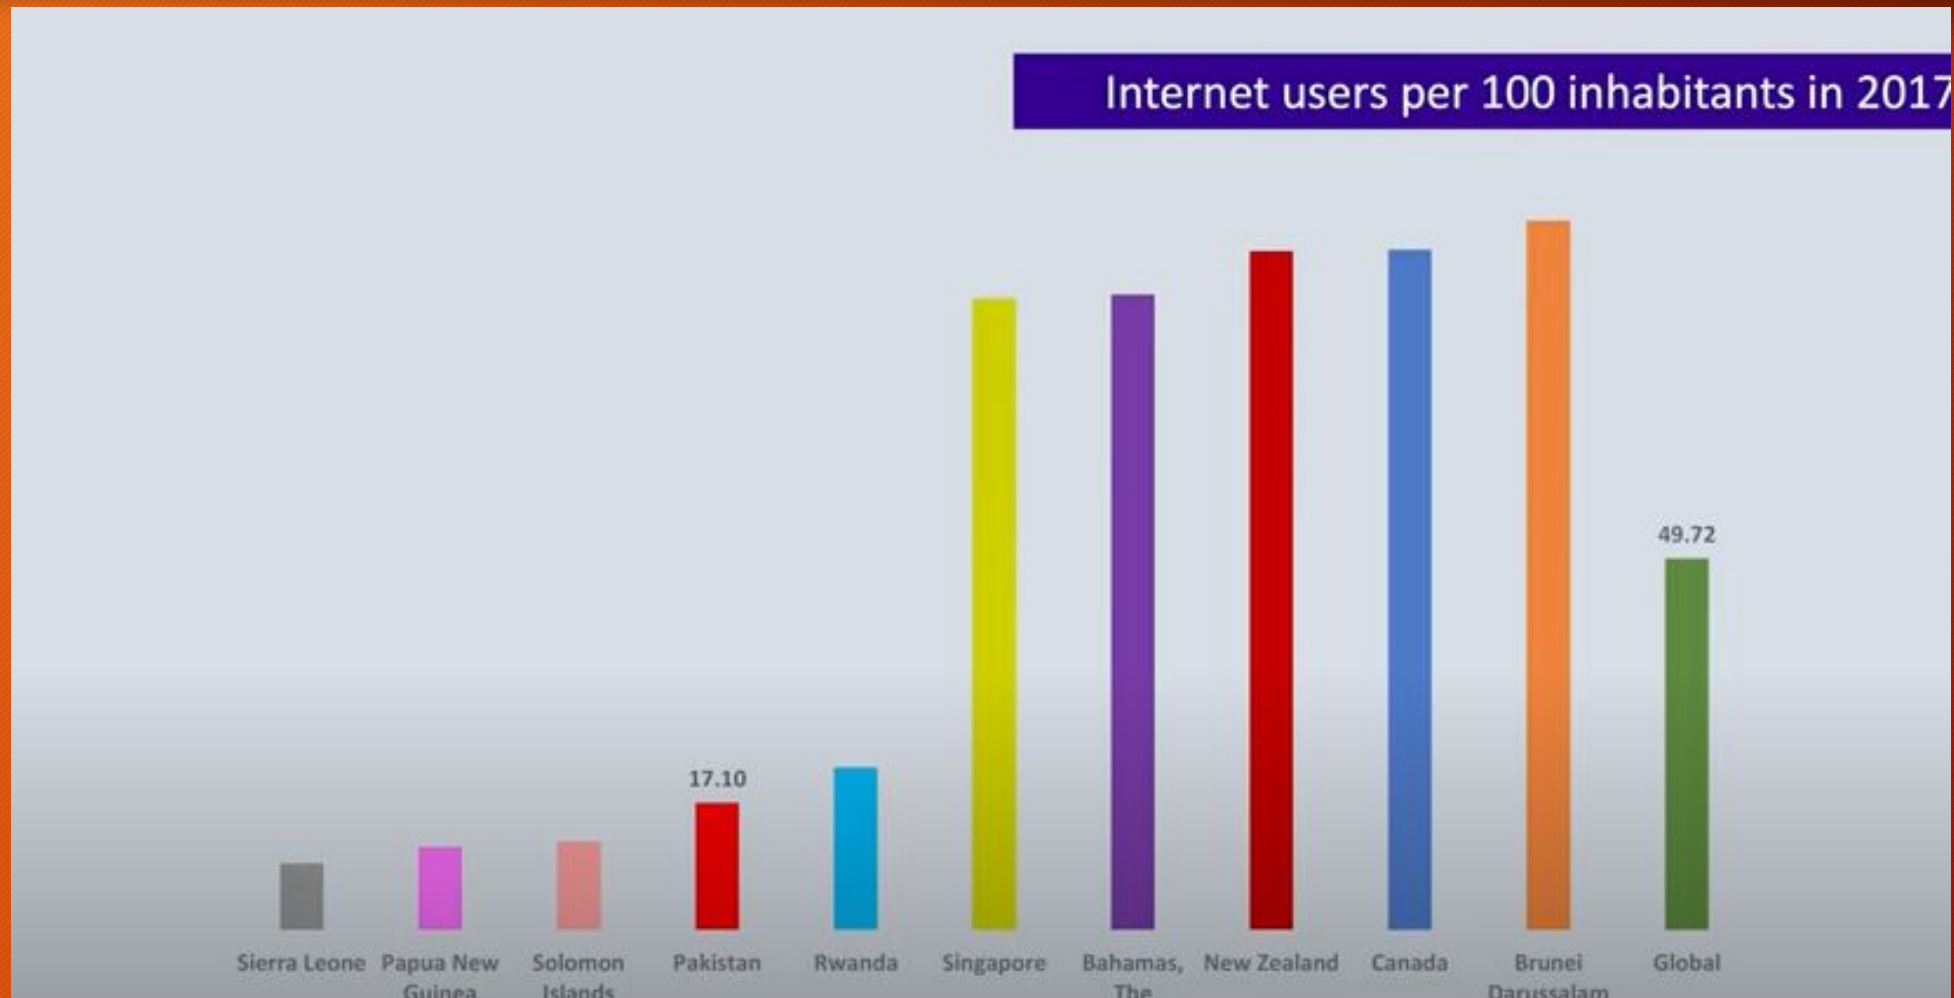

Challenges

Challenges of COVID-19

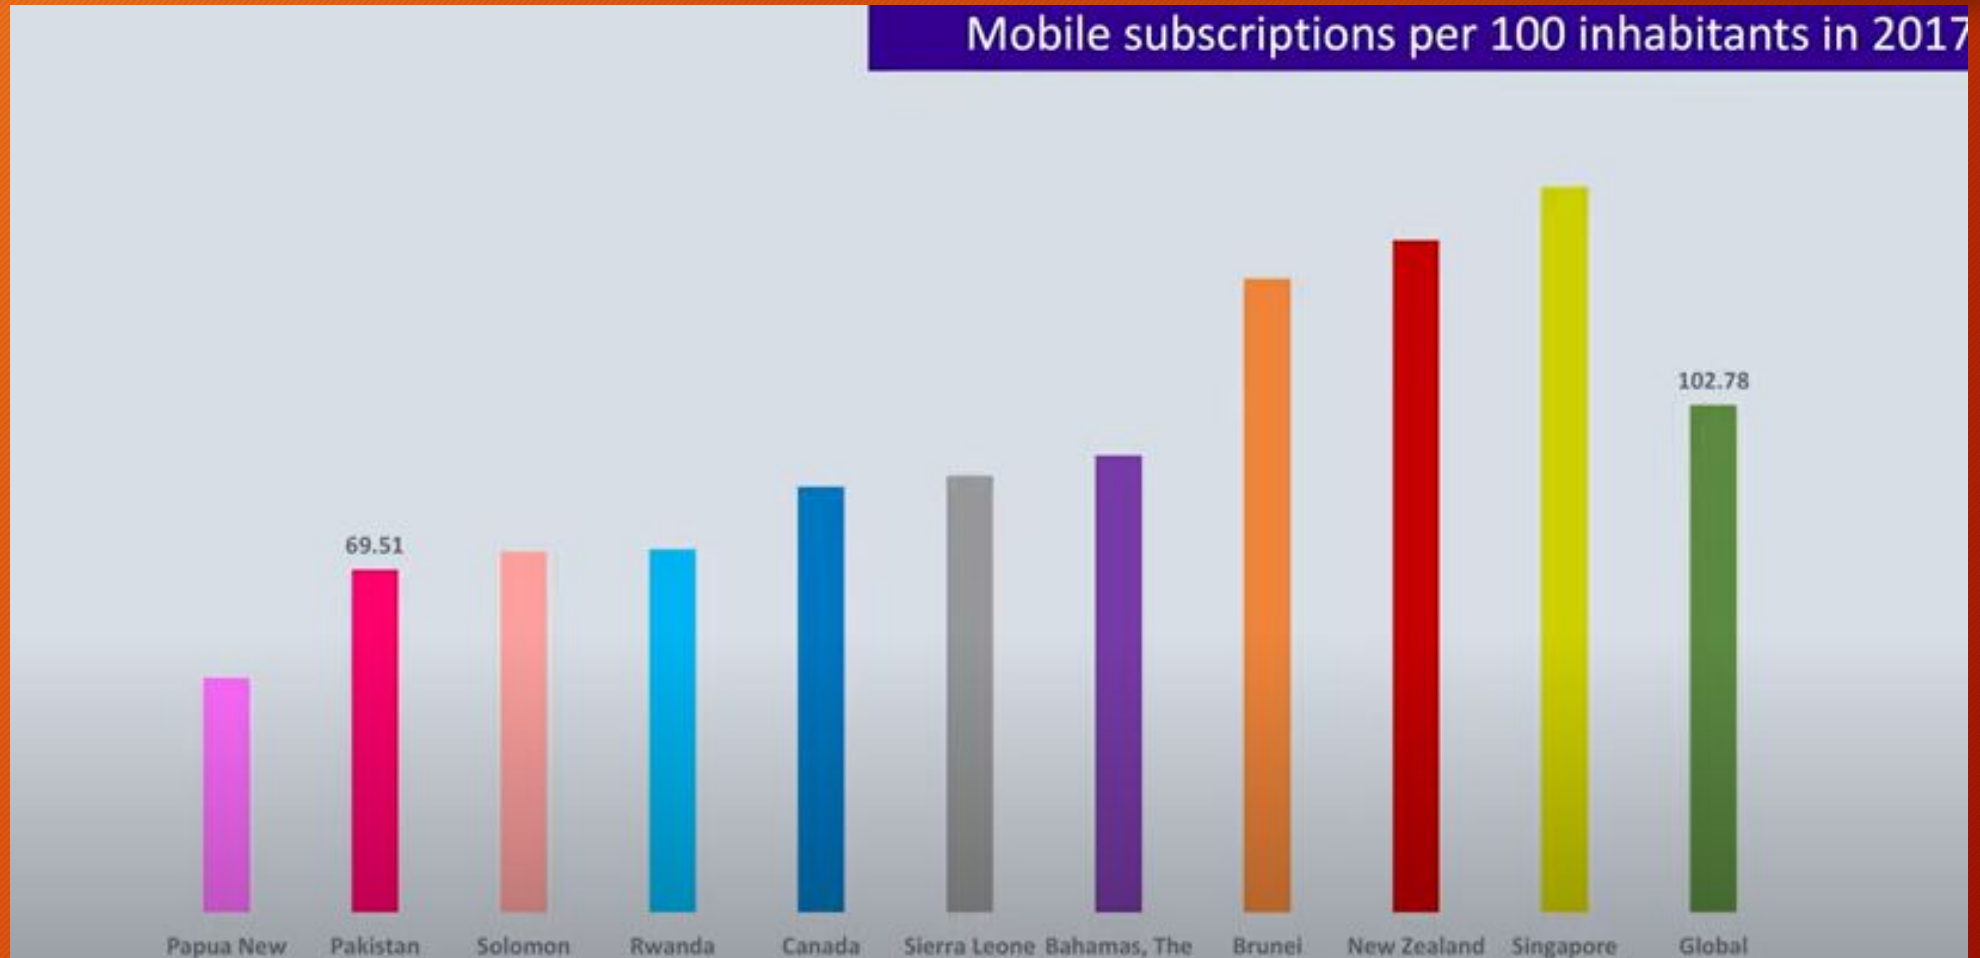

- Social Issues: continuing to combat inequalities during crisis
- Pedagogical challenge: adopting flexible approaches
- Harnessing technology for teaching & learning
- Psychological dimension

Khan Academy USA

Khan Academy: Urdu

The screenshot displays the Urdu interface of Khan Academy. At the top, there is a navigation bar with tabs for HOME, VIDEOS, PLAYLISTS, COMMUNITY, CHANNELS, and ABOUT. Below this is a grid of video thumbnails, each with a title, duration, and view count. The titles include topics like 'Asymptotes of Rational Functions Urdu', 'Rationalizing Denominators of Expressions Urdu', and 'Multiplying and Dividing Rational Expressions Urdu'. To the right of the video grid is a section titled 'Algebra New2' which lists various units such as 'Relations and Functions Urdu', 'Functional Relationships 1 Urdu', and 'Solving Radical Equations 1 Urdu'. The Khan Academy logo is visible in the bottom right corner.

IIST Mirpur-10, Dhaka-1216

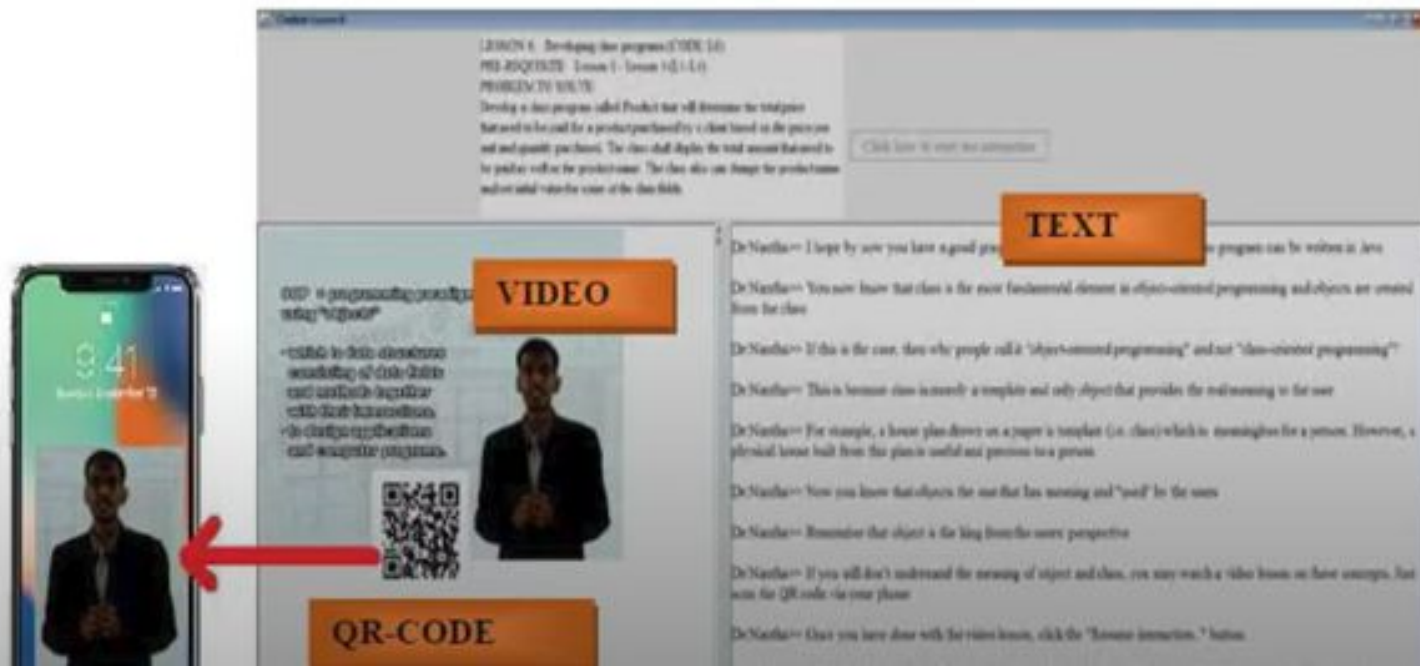

- Ideal Institute of Science & Technology (IIST)

The image shows a screenshot of the Ideal Institute of Science and Technology (IIST) website. The background features a group of students in a laboratory setting. The website layout includes a navigation menu at the top with links for Home, About Us, Online Application, Gallery, Notices, Contact, Skill Care, and Login Student. The main heading reads "Ideal Institute of Science and Technology (IIST)" with the address "105, Senpara Parbata, Mirpur-10, Dhaka-1216 (West side of Metro Pillar # 255)". A prominent "Apply Now" button is centered below the address. On the left, there is a red banner that says "g on 2022". At the bottom, there are three circular icons: an orange one for "Affiliation", a blue one for "Our Vision", and a pink one for "Our Miss". A mobile phone interface is visible in the bottom right corner, showing a WhatsApp icon and various system icons.

Jackpot Malaysia

Text, Video and Animated Images form the backbone of the chatbots. These chatbots too have QR-codes so that videos can be viewed directly from the smart-phone. While dialogues/conversation are important in learning programming but programming can't be learnt entirely through these type of communication. Thus, the chatbot also support immersive learning and visualizations, so that difficult Java programming concepts can be explained easily for easy understanding and to reduce the mental load of the students when learning programming. QR-codes, videos and animated images together provide the immersive learning environment in the chatbot.

How Augmented Reality (AR) Is Transforming The Education Industry

- The AR experience is thriving as a significant trend, and it is estimated that by 2023 there will be 2.4 billion Augmented Reality mobile users worldwide. However, there were only 200 million users in 2015. It is an excellent influx in numbers that can't be ignored. However, my interest in this article is looming around the usage of Augmented Reality in education and eLearning applications. Many of us are only aware of Augmented Reality being used in mobile games like Pokémon Go and social media platforms like Snapchat. However, education is another significant space where this technology can blow up the candles.

Options

Proportion of Content Delivered Online	Type of Course	Typical Description
0%	Traditional	Course with no online technology used — content is delivered in writing or orally.
1 to 29%	Web Facilitated	Course that uses web-based technology to facilitate what is essentially a face-to-face course. May use a course management system (CMS) or web pages to post the syllabus and assignments.
30 to 79%	Blended/Hybrid	Course that blends online and face-to-face delivery. Substantial proportion of the content is delivered online, typically uses online discussions, and typically has a reduced number of face-to-face meetings.
80+%	Online	A course where most or all of the content is delivered online. Typically have no face-to-face meetings.

Best Wishes to All
